

JESÚS EDUARDO PALOMO DELGADO

Address: San Luis Potosí, Mexico
Phone: +52 4441939589
Email: pd.eduardo@outlook.es
Website: eduardo-palomo.github.io/EPD-LAB/

ABOUT ME

Software Developer focused on building high-performance applications (React, Flutter, .NET) with clean architecture, SQL databases, and scalable logic integration. Experienced in optimizing application performance and reducing memory bottlenecks. Passionate about solving complex structural problems through agile workflows, and continuous self-improvement across emerging frameworks and modern software paradigms

TECHNICAL STACK

- | | |
|--------------------|---|
| Languages: | • C#, C++, JavaScript, Dart, SQL, HTML5 & CSS3. |
| Frameworks: | • React, Flutter, .NET, Node.js. |
| Cloud: | • Git/GitHub, Azure DevOps & Docker. |
| Databases: | • MySQL, SQL Server. |
| Skills: | • API Integration, Cross-Platform Mobile, UI/UX Performance, Agile/Scrum. |

WORK EXPERIENCE

XR & Frontend Developer / Software Engineer

OniricMob Sep 2024 – Present

- Designed and implemented core software architectures for interactive cross-platform applications using C#, React, and real-time engines.
- Integrated API services and optimized app state management to reduce loading times and memory consumption on mobile environments.
- Worked with version control (Git / Azure DevOps) and agile methodologies (Scrum) to ensure continuous deployment on critical project schedules

Software & Interface Optimization Engineer

Fyware (Aug 2022 – Feb 2023)

- Developed interactive frontend interfaces using C#.
- Collaborated with cross-functional development teams under Scrum to design and execute feature roadmaps.
- Refactored application logic and UI rendering pipelines, significantly improving frame rates and resource efficiency.

EDUCATION

Bachelor's Degree in Artificial Intelligence Engineering

jun 2026 - Present (In Progress)

Hybridge Education University

Specialist in designing algorithms, machine learning models, and software architectures for complex intelligent systems and automation.

Bachelor's Degree in Design and Art for Video Games

sep 2023 - Jul 2026

University of Advanced Technologies (UNIAT)

Professional skilled in 3D modeling, asset creation, and graphic optimization for real-time interactive engines and digital media.

ADDITIONAL INFORMATION

- Languages: Spanish (Native) | English (advanced Working Proficiency).
- Certifications & Training:
- Digital Organic Sculpture & 3D Pipelines (ZBrush / Blender / Substance) – Udemy.
- Agile Development & Scrum Fundamentals.
- Work Availability: Full-time | Remote / Hybrid | Immediate availability.
- Soft Skills: Problem-solving under pressure, cross-functional team collaboration, fast self-taught learner, agile/Scrum workflows.
